

Project & video can be downloaded at <https://github.com/ahmadsetiadi/lead-project>

1. What is Caprae's Mission?

Help entrepreneurs close more deals and build high quality business.

2. Why do you want to work at Caprae Capital?

I would like to further develop my experience with international companies. I am from Jakarta, Indonesia, and for the past six years I have been working remotely with a German company called Fleischhacker.

I have always been eager to explore new technologies and programming languages. Recently, I have been particularly interested in AI, especially AI SaaS, and I am very excited about the opportunity to learn more in this area. I am confident in my ability to adapt quickly, learn independently, and contribute effectively while continuing to grow in a global environment like Caprae Capital.

3. How is Caprae Changing the ETA Space and Broader PE?

Build strong operational infrastructure like using AI SaaS, advanced technology, an expert advisory bench, and cultural leadership for a fairer and more effective ETA.

4. What is your current working status in the US?

I am currently based in Jakarta, Indonesia, and I do not have US work authorization at the moment. I would require sponsorship to work in the US or remote opportunities with US-based companies.

5. Are you willing and able to work a minimum of 40 hours/week?

YES, I also usually work like that

6. Why Caprae Capital?

I admire the way Caprae using AI-driven tools.

7. What is your expected salary?

1500 USD per month

I'm ok no problem for 3 month probationary when start.

I'm ok to work 9AM-6PM EST during initial training.

I'm ok to be available during off hours in case of any emergencies
